A vase that keeps a memory

Memory Vase brings together a beautiful everyday object and a place for what we hold dear. Every vase and candle holder in the collection has a reliquary hidden in its base – a sealed compartment for a small keepsake.

It is not only about remembering those who are gone. Memory Vase also keeps the moments we are still living – love, travels, the birth of a child or an anniversary. The memory stays at home, in sight and among flowers.

The reliquary

The base of every piece holds a cavity that is separate from the space for water and flowers.

It is sealed with a screw cap made of anodised aluminium with a gasket, so the contents stay dry and safe. The cap opens with a coin and is almost invisible on the base.

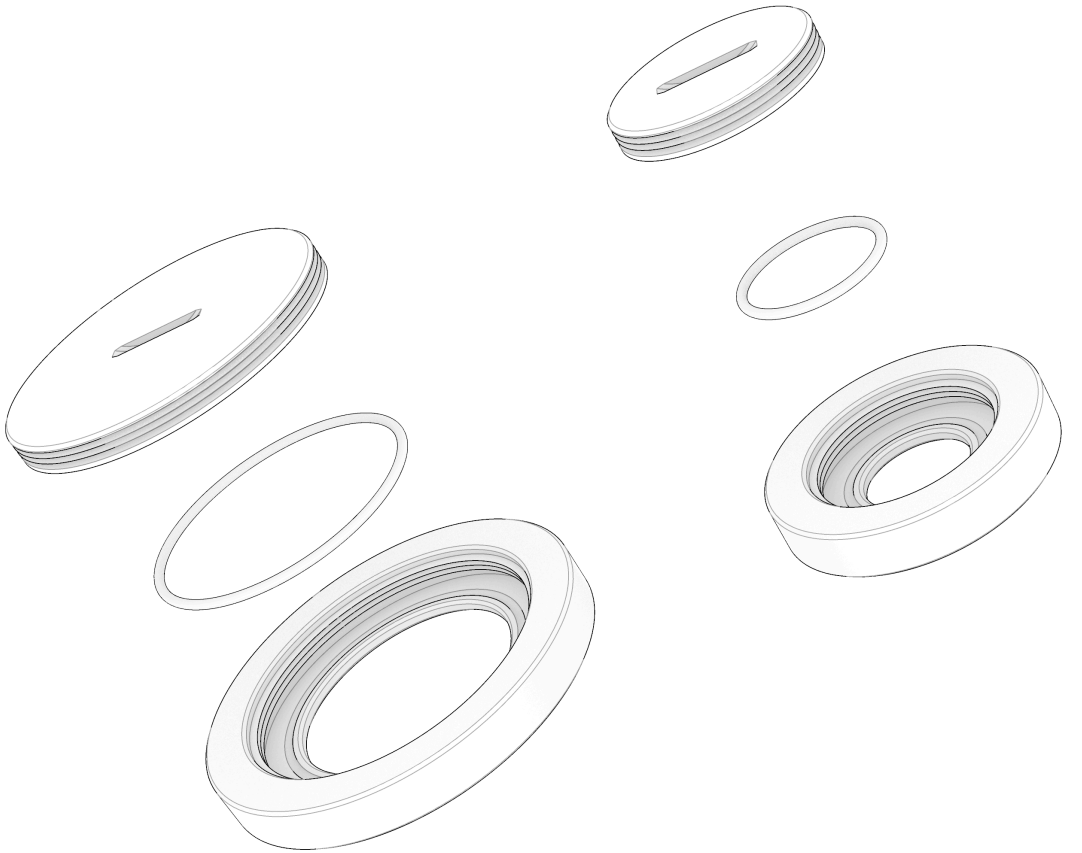

The cap

Anodised aluminium, screw cap with a gasket.

Two sizes to match the size of the piece.

Large cap
large vases
opening Ø 51 mm

Small cap
small vases and candle holders
opening Ø 23 mm

For every memory

- ashes of a loved one or a pet
- a lock of hair or fur
- petals from a wedding bouquet or a farewell
- pebbles and sand from travels
- wedding rings and small jewellery
- a letter, a note or a photograph

Aura

A soft, rounded, almost weightless form.

The name captures the gentleness with which the collection treats light and memory. The series comprises a large vase, a small vase and a tealight holder.

For funeral homes and florists

Funeral homes
A dignified memorial piece for the home that holds a portion of the ashes – as a companion to an urn or as a keepsake for several family members.

Florists
A vase with a story – a gift for a wedding, an anniversary, the birth of a child or a farewell. The bouquet gets a lasting home and the memory a value that never fades.
